Education

- Astana IT University**, BS in Computer Software Engineering 2021 – 2024
- GPA: 3.55/4.0
 - **Diploma Project - Kitaphub**: Developed a book e-commerce platform with an ML-driven recommendation engine using React and Java (Spring Boot).

Experience

- Software Developer**, LLP "CMC Technologies" – Astana, Kazakhstan Oct 2022 – Oct 2025
- SmartEcg Project**: 
- Achieved **100% unit & integration test coverage** using **JUnit + Mockito**, improving backend reliability.
 - Built a **mock external-service emulator + CRUD web app (Spring Boot + React)** to streamline internal development and reduce dependency delays.
 - Developed REST endpoints to integrate and normalize **SOAP-based external services**, simplifying service usage across the platform.
 - Designed and developed a centralized **Messenger Service** supporting **WhatsApp (Twilio), Telegram, Email, and SMS**, standardizing notifications across internal products..
- E-medosmotr Project**: 
- Built fully responsive UIs using **Next.js, Tailwind, and Mantine UI**, improving accessibility across desktop & mobile
 - Created **Playwright E2E test suite**, reducing critical user-flow errors to **0%** and improving release confidence
 - Developed analytics dashboards using **Recharts**, improving internal bug discovery rate by **20%**
 - Optimized database queries and document-generation workflows using **Drizzle ORM + tRPC**, decreasing response times by **40%**
 - Designed and implemented relational database structures with **Drizzle + PostgreSQL migrations**, improving data consistency and maintainability.
 - Independently developed a **secondary web** service integrated with the main platform, reaching **20%** user adoption
 - **Mentored two junior developers**, providing guidance on implementation, code quality, and best practices

Technologies

Languages: English - Proficient (IELTS 8.0 / CEFR C1), **Kazakh** - Native, **Russian** - Fluent

Programming Languages: JavaScript/TypeScript, Java, Python

Frontend: React, Next.js, TailwindCSS, Mantine UI, shadcn/ui, MUI, Recharts, Redux, Zustand, TanStack Query

Backend: Spring Boot, Express, Elysia, Fastify, tRPC, Socket.IO, RabbitMQ

Databases & ORMs: PostgreSQL, MongoDB, Redis, Drizzle ORM, Prisma, Hibernate

Testing: Playwright, Jest, JUnit, Mockito

Tools & DevOps: AWS, Docker, Nginx, Linux/CLI, Github Actions
